

SkinPen®

THE BELLUS MEDICAL DIFFERENCE

Bellus Medical raises the bar with SkinPen®, the only U.S. engineered and manufactured microneedling pen on the market. SkinPen not only delivers superior reliability, safety, and performance, but also provides peace of mind knowing it's a product you can trust.

QUALITY

- U.S. engineered and manufactured by leading medical device manufacturer.
- Medical grade motor certified at 7,000 RPMs.
- Clinically tested design to support ergonomic flexibility.
- Cordless with a medical grade battery giving you confidence for a full day use.
- Battery life indicator with LED smart technology to communicate with user.

SAFETY FEATURES

- Sterile, single use cartridge houses reciprocating mechanism typically enclosed in the pen. Single use of these redesigned cartridges ensures long term reliability of the pen and reduces downtime for your practice.
- Ingress protection to prevent any blood, fluid or serum present during the procedure from penetrating into the pen.
- 14 stainless steel medical grade needles create 1600 micro-injuries per second for increased efficiency.
- Bio-Sheath designed specifically for SkinPen helps protect your patients from potential cross-contamination, ensuring the fluids generated during the procedure do not pass from contaminated glove to SkinPen.
- Minimally-invasive with little downtime.
